

Colour and typography reference for editorial and partner use. Every value on these pages is read straight from the platform's design tokens, so it matches what the product actually renders.

Colour

Four brand hues, warm-tinted throughout, plus the state colours the interface needs. Where a hue is too light to carry small type, the accessible text variant is listed beside it.

	NAME	HEX	RGB	TOKEN	WHERE IT IS USED
	Plum	#2D1B3D	45, 27, 61	--plum	Brand anchor. Dark surfaces, headings, the app's theme colour.
	Plum deep	#241430	36, 20, 48	--plum-deep	The deeper end of the plum gradient.
	Coral	#E8775A	232, 119, 90	--accent	The accent. Fills, tints, the pulse dot. Never small text.
	Coral text	#A84430	168, 68, 48	--accent-text	Coral as text on light surfaces. Clears WCAG AA.
	Coral fill	#D5431E	213, 67, 30	--accent-fill	Coral as a filled button carrying a white label. Clears AA.
	Cream	#F7F3EE	247, 243, 238	--cream	Page background. Never pure white.
	Paper	#FFFFFF	255, 255, 255	--paper	Card surface.
	Jade	#4A8C6F	74, 140, 111	--jade	Verified, live, success.
	Jade text	#3C7159	60, 113, 89	--jade-ink	Jade as small text on light surfaces. Clears AA.
	Amber	#E8B44A	232, 180, 74	--amber	Warning and medium states. A fill colour, never type.
	Danger	#B91C1C	185, 28, 28	--danger	Destructive actions: delete, block, report.
	Ink	#1A1A1F	26, 26, 31	--ink	Body text.

Typography

Two families. Fraunces sets editorial type and the wordmark; DM Sans sets everything in the interface. Both are open source under the SIL Open Font License 1.1, so you can set headlines about us in the real faces.

A queer network, *rooted in Lisbon.*

DM Sans carries body copy, labels and every control in the product.

Fraunces carries display type, pull quotes and the wordmark, with the

italic reserved for emphasis.

STEP	TOKEN	SIZE
Hero	--text-hero	clamp(3.125rem, 8.2vw, 7.375rem)
Display	--text-display	clamp(2.125rem, 4.4vw, 3.625rem)
Title	--text-title	clamp(1.75rem, 3.5vw, 2.875rem)
Heading	--text-heading	clamp(1.375rem, 2.4vw, 2rem)
Subhead	--text-subhead	1.25rem
Body large	--text-body-lg	1.0625rem
Body	--text-body	0.9375rem
Body small	--text-body-sm	0.875rem
Caption	--text-caption	0.8125rem
Label	--text-label	0.78125rem
Eyebrow	--text-eyebrow	0.8125rem

Using the marks

- Clear space: the height of the capital *Q* around the wordmark on every side; one core-dot diameter around the mark on its own.
- Minimum size: the wordmark 96 px wide on screen, 24 mm in print; the mark 40 px or 10 mm.
- Beside the wordmark the mark is the dot alone. The ringed symbol stands on its own, or above the wordmark in the stacked lockup.
- The wordmark always carries the coral pulse dot, except in the coral colourway, where the dot becomes plum. Do not recolour the dot to anything else.
- On a light ground use the primary wordmark; on plum or any dark ground use the inverse.
- The wordmark is Fraunces semibold with “Pulse” in the italic. Do not re-set it in another face.
- Do not stretch it, set it on busy photographs, or pair it with rainbow gradients we did not make.
- Coral never carries small type. Use the coral text value for that.
